

MMF3.3

Audiophile turntable with unique dual-plinth construction

- music hall's unique dual-plinth construction
- gorgeous high-gloss piano lacquer finish
- top tier 8.6" carbon fiber tonearm with aluminum headshell
- AC synchronous motor for superior speed stability, separately isolated on the lower platform
- DC/AC power generator acts like an AC filter for pure power and less motor vibration
- Ortofon 2M Red cartridge
- the cartridge supplied is properly aligned and mounted
- precision stainless steel main bearing sheathed in Teflon® for noise-free fluid operation
- dynamically balanced alloy platter with soft felt mat
- high quality gold RCA connectors
- special vibration damping adjustable feet
- low noise belt-drive design for 33.3 and 45 RPM with electronic speed change
- dust cover and 45 rpm adaptor included
- available in high gloss black, white, red and walnut color options

high gloss colour options

Walnut finish

Speeds	33,3 / 45 RPM (electronic speed change)
Speed variance	+/- 0.8%
Wow and flutter	+/- 0.1%
Rumble	> -70dB
Effective Tonearm-Length	218.5 mm (8.6")
Effective Tonearm-Mass	9.0 g
Overhang	18.5 mm
Output	RCA Phono
Power Supply	15V/ 0-0.8A DC
Power consumption	< 0.3 W (stand by)
Dimensions (BxHxT)	463 x 139 x 336 mm
Weight	10 kg (packaged)

Audiophile turntable with unique dual-plinth construction

The music hall mmf-3.3 series turntables are 2-speed belt-driven audiophile turntables employing the unique dual-plinth construction originated by music hall. The distinctive design isolates the critical sound reproducing components from the motor and the base-chassis, so motor vibrations do not reach the cartridge and resonances from the ground and the base chassis are damped effectively.

Platter, main bearing, tonearm, and cartridge are mounted on the top platform and the motor, switch, wiring, and feet are mounted on the bottom platform. Visco-elastic cones separate the two platforms and provide additional vibration damping.

The mmf-3.3 series comes complete with an 8,6" carbon fiber tonearm with an aluminum headshell fitted with an Ortofon 2M Red cartridge.

This is the first time Music Hall is able to offer the split-plinth technology for less than 1000€/USD. Usually, in this pricerange you'll only find a simple construction without motor or turntable base isolation.
